<h2 class="w3-cursive">Why step in Skincare Routine is important?</h2>

<h5 class="w3-padding-32 w3-cursive">Great skin is not just a matter of DNA; in fact, your daily habits have a significant impact on what you see in the mirror.

There is a reason why it is extremely important to do things in the correct order. After your shoes, you can not put your socks on! For your skincare, the same applies</h5>

<p class="w3-text-grey w3-medium">The purpose of any skin-care routine is to tune

your complexion so that it performs at its best, as well as troubleshooting or targeting any areas you want to focus on. The science behind skin care products has come such a

long way, but there is still no immediate remedy. You need time to enjoy the advantages. Results are only seen by regular usage and are usually targeted at using a product to

notice a change for at least six weeks, once or twice daily.

</p>

<p class="w3-text-grey w3-medium">Lets check it out your routine, is the same as the list on the side? :P Dont forget, beauty is pain but do not take any harmful ingredients or any dangerous medical without doctor permission.</p>

<p>According to Dr. Heather Rogers, a board-certified dermatologist and dermatological surgeon, the correct application of the skin care products

ensures that your skin gets the full benefits of each product. Think thin-to-thick in general, but you also want to first use the products with the most effective ingredients to penetrate the skin.

In addition to the order of application, some experts claim that the time it takes for your skin to absorb your products is also crucial to remember.</p>

        <p>However, Dr. Rogers acknowledges that this is not always
feasible, because most of us are always in a hurry to get somewhere
(or hit the sack).
